

Medical Image Analysis Report

Patient Name: Sourabh
Age: 22 years
Gender: Male
Scan Type: MRI
Date: 2024-12-08 21:18:58

Analysis Results

Prediction: no-tumor
Confidence: 100.0

Age-Specific Assessment

Young adulthood is a critical phase where tumors may develop more aggressively. Surgical treatment might be necessary.

Gender-Specific Considerations

No tumor was detected. Regular check-ups are recommended for ongoing monitoring.

Recommendations

No tumor was detected. Maintain regular medical check-ups and report any new symptoms promptly.
